

RELIABLE OUTCOMES TO ADVANCE **EPILEPSY** **RESEARCH**

Epilepsy studies face unique challenges. For one, patients experience symptoms including seizures and the loss of awareness, making it difficult to self-report. Each patient may have multiple caretakers, especially pediatric patients, so managing the various consents and tracking data submissions can be difficult.

Signant's SmartSignals™ digital solutions and neurological experts can simplify epilepsy clinical trials.

CAPTURE ACCURATE DATA

Our seizure diary, a key component of our eCOA solution, uses an electronic, screen-based format to collect data at scheduled times that is easy to use for patients and their caretakers. Completion windows prevents entries outside of the protocol's determined period, while time and date stamps results in trackable, auditable, and defensible data.

GAIN EXPERT GUIDANCE

Signant Health is proud to have been one of two companies selected, based on our work, to develop a best-in-class electronic seizure diary with The Epilepsy Study Consortium (TESC). Through our work designing a standardized diary, our in-house experts are well-versed in how to improve the patient experience and the data collection process.

MAKE PARTICIPATION EASIER

Supporting multi-person meetings, Signant's Telemedicine solution can reduce the number of site visits required by epilepsy patients and their caretakers. The secure, HIPAA-compliant platform enables study teams to share and annotate on top of medical images for improved comprehension.

MANAGE THE VARIOUS CONSENTS

Capable of being used on provisioned or personal (BYOD) devices, our eConsent solution guarantees that consent and assent is given with the correct IRB- or EC-approved form. The digital tool walks patients through study information via engaging multimedia and lets them flag sections they need clarified – for a truly informed signature.

At Signant, our focus is helping you develop and deliver treatments or therapies faster in order to improve the quality of life for epilepsy patients everywhere.

DISCUSS YOUR NEXT STUDY WITH US

Our global team of therapeutic area experts advise on all areas of the clinical development process, including:

- Clinical science and medicine
- Data analysis
- Regulatory
- Operations and trial administration
- Global logistics
