

PARTNER WITH US TO DELIVER SAFE, SUCCESSFUL INFLUENZA VACCINES

Signant SmartSignals solutions, built by sites and patients for sites and patients, can help study teams develop life-saving influenza vaccines for a global population.

eCOA

Our feature-rich eCOA platform contains a built-in reactogenicity diary instrument that can be used on provisioned or bring-your-own devices to collect high-quality safety and efficacy data, as well as Patient Concierge, a digital engagement tool that enables remote access to study information for easy review at-home and alerts to keep patients on track with PRO assessment requirements. Recent enhancements to our eCOA design capabilities also make it easier for study teams to customize scales for their study builds.

RTSM

Minimize waste by directing supplies only to where they're needed in your study – our nimble solution can send more deliveries to sites that are enrolling patients quickly, and limit deliveries to sites with lower enrollment. Deploy our RTSM in as little as 1-4 weeks to efficiently handle complex randomization schemes, dosing schedules, or mid-study protocol changes.

eCONSENT

Our solution makes it easy for site personnel to acquire remote consent or re-consent from patients wherever they are. When coupled with our Telemedicine platform, study teams can virtually connect with participants to maintain surveillance through flu season and remotely monitor for adverse events, especially for elder patients with comorbidities.

PATIENT CONCIERGE

The eCOA platform's digital engagement app consolidates all study information in one place for patients' convenient review from home, driving better study comprehension, adherence, and retention. Patient Concierge also enables remote visits or on-demand video calling for a simpler participation experience with fewer on-site visits required.

SCIENTIFIC ADVISORY

Our Science and Medicine team supported the launch of a global COVID-19 vaccine study in just five weeks, helping the sponsor achieve Emergency Use Authorization in record time. Plus, our in-house infectious disease expert has 25+ years of experience in the field. See how our advisors can serve as an extension of your study team to help develop successful vaccines.

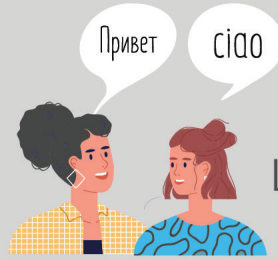

TRUST SIGNANT TO HELP SAVE LIVES:

With Signant, you get more than advanced technology. Our robust solutions and in-house team of clinicians will help sponsors:

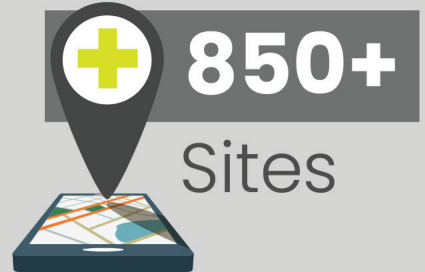

1. Launch quickly with better results
2. Collect high-quality PROs and safety/efficacy data
3. Streamline remote operations
4. Keep patients engaged through long study cycles to improve retention
5. Make better decisions related to protocol development and more
6. Meet storage and handling requirements for expensive products
