

RUN SUCCESSFUL PAH STUDIES WITH PROVEN SOLUTIONS

Pulmonary Arterial Hypertension (PAH) is a rare, progressive, vascular disease with high mortality and limited treatment options. Continued research is essential to bring hope to patients suffering from this disease. **At Signant, we believe that with the right tools, researchers will gain the necessary understanding of diseases like PAH to advance treatments.**

ADMINISTER DISEASE-SPECIFIC QUESTIONNAIRES

SmartSignals eCOA makes it easy to administer quality-of-life, respiratory, and congested heart failure questionnaires – this includes the common KCCQ and SGRQ. The easy-to-use technology also eliminates the need to transcribe from paper and provides time-stamped, attributable data.

SIMPLIFY BLINDED RANDOMIZATION

Signant's RTSM solution leverages proprietary algorithms to optimize drug supplies for blinded PAH studies. This digital IP management tool gives you complete control and optimal visibility of clinical supplies throughout your entire study.

MONITOR PATIENTS' LIFESTYLE

Our eCOA solution, you'll gain continuous, real-time data on each patient's sleep and activity patterns. This objective data will enhance your understanding of the disease's and treatment's impact on a patient's quality of life.

STANDARDIZE PAH ASSESSMENTS

Standardizing PAH assessments across sites is essential to producing reliable data. Our in-house experts develop sponsor-specific videos for Signant's Rater Training & Qualification to teach raters the proper methodologies when setting up a walking test course, counting laps, and administering supplemental oxygen.

ALLEVIATE PATIENT CONCERNS

Using multimedia to support various learning styles, SmartSignals eConsent solution educates potential participants on study requirements, including the invasive procedures like cardiac catheterization. Patients can flag sections that need clarification and checks their comprehension to guarantee you capture a truly informed consent.

At Signant, our SmartSignals solution suite was designed specifically to meet the needs of sponsors, sites, and patients.

SIGNANT'S PAH CLINICAL TRIAL EXPERIENCE

SMARTSIGNALS SOLUTIONS

The SmartSignals solutions can be used individually or integrated together for a seamless, end-to-end digital experience.

DISCUSS YOUR NEXT STUDY WITH US

Our global team of therapeutic area experts advise on all areas of the clinical development process, including:

- Clinical science and medicine
- Data analysis
- Regulatory
- Operations and trial administration
- Global logistics
