

TECHNOLOGY TO ENABLE REMOTE PARTICIPATION

Technology-enabled solutions allow patients to access health professionals from home, which can mean all the difference for those facing debilitating symptoms. Signant Health designed SmartSignals Telemedicine to offer flexible, at-home consultations that makes it easier to participate in a clinical trial.

**REDUCE THE
NUMBER OF
ON-SITE VISITS**

**ENHANCE
THE PATIENT
EXPERIENCE**

**IMPROVE
RETENTION
RATES**

**MINIMIZE
STUDY
DISRUPTIONS**

**ACCELERATE
SITE-PATIENT
COMMUNICATIONS**

Why choose SmartSignals Telemedicine?

- 01 BYOD COMPATIBILITY**
Enable patients to access sites anywhere using their mobile or web device.
- 02 REGULAR NOTIFICATIONS**
Updates and reminders keep patients informed and on track to complete study requirements.
- 03 CONFIGURABLE VISIT TYPES**
Configure visits to enable visit-specific checklists and forms.
- 04 OPTIMAL SECURITY**
Powered by encrypted video, audio, chat, and messaging capabilities, the virtual platform promises to keep patient information secure.

- 05 INTERNATIONAL REACH**
Translation and localization capabilities enable global support to a wider and more diverse patient population.
- 06 DEVICE INTEGRATION**
Open platform available for wearables and exchanging data.
- 07 RECORD VISITS**
Support protocols that require audio/video recordings during study visits.

Recreating the clinic experience in a virtual platform, SmartSignals Telemedicine’s intuitive technology was designed to improve the clinical trial journey.
