

CLINICAL DEVELOPMENT SOLUTIONS TO IMPROVE TYPE 1 DIABETES STUDY OUTCOMES

Despite recent advances in the treatment of type 1 diabetes, there remains unmet need for effective treatment solutions for this disease. Signant Health improves opportunities for study success by applying clinical research technologies and scientific expertise to help researchers address barriers to success.

COLLECT BETTER QUALITY DATA

SmartSignals eCOA helps study teams collect more high-quality data with less effort than paper-based alternatives. Plus, our research-grade blood glucose meters automatically transfer readings. The result is complete, accurate, and timely data without adding burden to patients' routines.

SIMPLIFY STUDY PARTICIPATION

Managing type 1 diabetes is a daily effort, so we have built engagement solutions into our eCOA system to keep study participants on track and support caregivers. Interactive guides, easy access to study documents and contacts, customizable notifications, and video visits make participation easier.

GO GLOBAL WITH HYBRID STUDY DESIGN

Global studies designed with decentralized technology elements can help expand the reach of type 1 diabetes studies while simplifying study conduct and participation. Signant's software solutions, advisory services, and global operations infrastructure help sponsors design and conduct effective, efficient clinical trials.

OPTIMIZE SUPPLIES EFFICIENCY

With so many medications and devices used in type 1 diabetes studies, study teams need solutions to maximize supplies efficiency without burdening sites. Signant's RTSM system applies predictive algorithms to ensure optimal product allocation and usage. We can also deploy system and protocol amendments much faster than other solutions thanks to an innovative agile design process.

COMBINE SOLUTIONS FOR AN END-TO-END DIGITIZED STUDY

Each solution and service within our SmartSignals evidence generation platform can be used independently, but when combined, they create an intuitive digital ecosystem for creating and managing complex global studies. Plus, every study is supported by a dedicated team of clinical science and operations experts.

At Signant, our focus is helping you develop and deliver treatments or therapies faster in order to improve the quality of life for type 1 diabetes patients everywhere.

DISCUSS YOUR NEXT STUDY WITH US

Our global team of therapeutic area experts advise on all areas of the clinical development process, including:

- Clinical science and medicine
- Data analysis
- Regulatory
- Operations and trial administration
- Global logistics
