

# COMPREHENSIVE SOLUTIONS FOR A SIMPLER STUDY EXPERIENCE

Backed by 20+ years of experience supporting oncology clinical research, Signant SmartSignals™ solutions are designed to meet complex protocol requirements while simplifying study processes. See how our technology solutions and clinical science expertise can streamline workflows, ensure high-quality data, and make study participation easier.

## **STREAMLINE CONSENTING PROCESS**

Enable remote or on-site consent, and easily handle multiple consents as well as reconsents following mid-study protocol changes, all of which can help your study reduce costly consent-related audit findings. Our eConsent platform also lets patients flag areas that require further clarification, improving their study comprehension for truly informed consent.

## **HANDLE COMPLEX STUDY DESIGNS**

Optimize clinical supply distribution to reduce waste, accommodate multiple treatment arms and administration cycles, and adapt seamlessly to cohort assignments in basket studies. You can also simplify patient enrollment by integrating our RTSM and eConsent tools.

## **IMPROVE PRO DATA CAPTURE**

SmartSignals eCOA enables remote data collection to help study teams measure meaningful patient-reported outcomes (PROs) on health-related quality of life, physical function, treatment side effects, adverse events, and more, without additional participation burdens.

## **REDUCE PARTICIPANT BURDENS**

Integrate SmartSignals eCOA with our Telemedicine platform to enable video assessments, reducing the burden of on-site consultations for sites as well as patients experiencing severe disease or treatment symptoms.

## **KEEP PATIENTS ENGAGED**

As a module of our eCOA solution, Patient Concierge enables appointment reminders, access to study information at-home, and video visits for remote assessments.

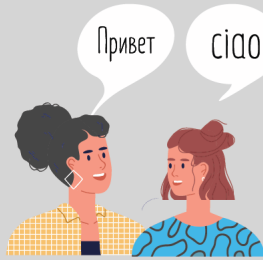

## **DIGITALIZE THE ENTIRE PROCESS**

While all of our solutions can be used as standalone tools, they can be combined for a fully digitalized process that further enhances the accuracy and efficiency of your colorectal cancer study.

At Signant, our focus is helping you develop and deliver treatments or therapies faster in order to improve the quality of life for people living with colorectal cancer.
